

WIRELESS ANALOG CLOCKS – WOOD SERIES

Pyramid offers a variety of wireless analog clocks, including a line of hardwood clocks for high-tech performance with a more traditional look. The proven industry standard 915MHz radio frequency delivers a dependable wireless synchronized clock signal in almost any vertical market. The clocks are made from solid hardwood and are available in a variety of finishes such as dark cherry, walnut, and clear oak. They feature easily viewable faces with years of maintenance-free service.

Pyramid's **Wireless Analog Clocks** are ideal for facility renovation, retrofit design, and new construction applications. Since the clocks receive their radio time frequency from a Pyramid TimeTrax Sync Transmitter, they will stay on time virtually anywhere throughout your facility.

With the central time source being captured from GPS, NTP and/or the facility's internal network, it makes for a universal system almost anywhere. And, with no FCC license needed, it is the most simple to use plug-and-play installation system on the market. Not to be confused with an Atomic Clock.

- **Wood finish provides an attractive addition to schools, conference rooms, lobbies, libraries, hospital waiting rooms, and more!**
- **Stress-free, low-maintenance wireless clock synchronization**
- **Adjusts for Daylight Savings Time and resets if power outage occurs**
- **16.5" and 20" clock sizes available in roman or arabic characters with dark cherry, walnut, and clear oak finishes**
- **5-year manufacturer's limited warranty**
